SECURANT USA

MAKING THE IMPOSSIBLE POSSIBLE

Do you wish your drivers actually followed your driving and fueling policies?

If they did you could reduce your fleet fuel, operations, labor, and maintenance costs. It would even decrease risk and eliminate fraud, but it seems like you would need some kind of business crystal ball right? What if I told you that the technology existed to do just that and better yet, that it would cost you nothing to have it!

Too good to be true, right?

Well, finally it's not. Our team here at Securant would like to introduce our patented fleet and fuel management system SecurFleet.

SecurFleet is a comprehensive fuel and fleet management solution that uses wireless, plug and play, components to save you money in your fleet operations guaranteed. We set up SecurFleet to enforce your driving and fueling policies and then you can forget it, it's that easy. Works with any fuel tank and vehicle from class 8 tractor to golf carts.

Securant uses patented technology, developed to allow real time 100% fraud proof control during the fueling process at the pump. Combined with GPS systems on the vehicle to report driver performance, maintenance, and logistics SecurFleet gives you control like no other system can**.** Don't have an onsite fueling system? No problem we can show you a SecurFleet enabled fueling station near you that will save you money at the pump. **We are so sure SecurFleet will help save you**

money that for a limited time we will let you try it for free.

Bottom Line: We will save you a minimum of 10% of your fuel costs plus you get a free 30 day test drive to prove it at our expense. There is no down side!

How can I get all of these improvements and a boost to the bottom line with Securant?

Uncle SAM wants you to save our resources, help create jobs, and stimulate the economy. Hence, the Small Business Job Creation Act of 2010 was enacted.

This Act was passed so that your company can upgrade its management technology to Securant's SecurFleet and write off the entire cost of the system in this business year. To get you to make a decision, without requiring another act of congress, Securant is offering a lease option so you can add profit to your bottom line today. **A Securant lease might be the most profitable decision you make all year since you will receive the full deduction credit this fiscal year without the full capital outlay.** In other words, leasing with Section 179 is a bottom line enhancing tool for this year. In addition you benefit from the 10% + savings in operational costs for years to come! Now that is a nice 4th quarter bonus!*

For more information on how you can have Securant technology working for you today, call my direct line at (727) 916-7327 or click here for an animation of how the system works www.SecurantUsa.com
